

# MRV EVENTS

## SUMMARY:

Developed a web-based Event Management System using Django that allows users to browse events, make bookings, and manage event details efficiently. The system supports different event categories such as weddings, concerts, and birthdays, with secure user authentication and booking management features.

## TECHNOLOGIES USED:

Python, Django, SQLite, HTML, CSS, Bootstrap

## KEY FEATURES:

User Registration and Login System

Event Category and Event Management

Event Booking Functionality

Multiple Payment Options (Cash, UPI, Card)

Booking Status Tracking (Pending, Confirmed, Cancelled)

Admin Panel for Managing Events and Bookings

Database Integration with SQLite
